TIFFANY RENEWED

Vele stukjes gepuzzeld glas in de meest sublieme kleuren komen samen in een handgemaakt kunstwerk. Geïnspireerd op invloedrijke kunststijlen en gemaakt volgens het originele Tiffany procédé. **Onze nieuw ontworpen Tiffany objecten schitteren door uniciteit en weldoordachte vorm- en kleurcombinaties.** De wondermooie glasstukjes, wispelturig of geometrisch van vorm, blijven de aandacht trekken door variaties in kleur en textuur. Een fascinerend lichtspel vormt tenslotte de bekroning van het unieke glaskunstwerk.

Many pieces of glass in sublime colours come together in a handmade artwork. It is inspired by influential art styles and made using the original Tiffany technique. **Our newly designed Tiffany objects stand out due to their unicity and well-thought-out shapes and colour combinations.** Stunning pieces of glass, whimsical or geometrical in shape, keep drawing attention because of the variations in colour and texture. When light shines through the glass, the enchantment of the unique glass art is complete.

In einem handgearbeiteten Kunstwerk wurden viele Glasstücke in erhabenen Farbe zusammengefügt. Es ist von einflussreichen Kunststilen inspiriert und wurde unter Verwendung der originalen Tiffany-Technik hergestellt. **Unsere neu entworfenen Tiffany-Objekte stechen auf Grund ihrer Einzigartigkeit und wohl überlegten Formen und Farbkombinationen heraus.** Atemberaubende Glasstücke, eigenwillig oder geometrisch geformt, ziehen wegen ihren Farb- und Texturvariationen die Aufmerksamkeit immer wieder auf sich. Wenn das Licht durch das Glas scheint, ist die Verzauberung durch die einzigartige Glaskunst komplett.

De nombreux morceaux de verre dans des couleurs sublimes s'associent pour former cette œuvre d'art réalisée à la main. Elle s'inspire de styles artistiques d'influence et est réalisée en utilisant la technique Tiffany d'origine. **Nos nouvelles créations Tiffany se démarquent par leur originalité, leur forme recherchée et leur palette de couleurs.**

Des pièces fabuleuses de verre, avec des formes en arabesques ou géométriques, captent le regard par leur richesse en couleurs et en texture. Quand la lumière brille au travers du verre, l'effet enchanteur de ces œuvres d'art est à son comble.
